Recognition Day – Page 6

Behind the Lines...

The committee of faculty, alumni and students appointed by Chancellor George L. Simpson to assist in finding a successor to President O'Rear is working hard at the job. The search goes on. The committee is now meeting on a weekly basis.

As we go to press we have had successful alumni dinner meetings in seven areas in Georgia. Please plan to attend the alumni dinner meeting in your area if one is scheduled there in January or February. It's more important than ever that we keep you informed and have this opportunity to answer your questions and hear your comments.

Did you see the advertisement in the last issue about the Charitable Gift Annuity Program now being administered by the MCG Foundation? Have you ever wanted to make a gift to advance the work of your Medical College, but felt unable to do so because you may need the income therefrom for your future living expenses? A Gift Annuity Agreement may be the answer.

This agreement furnishes an assured income (up to 10 per cent, depending upon your age) for your lifetime. Your Agreement will pay you a guaranteed fixed dollar income semi-annually. The amount of income is determined by your age and the amount of annuity purchased. And you have the privilege of designating the part of MCG's work you wish to benefit. If your gift is to become an endowment fund in your name, the income will continue for all the years to come to advance the cause you believe in.

If you're interested, I'd like to discuss with you the many tax advantages. One of the most attractive is that much of the income is completely tax-free. Gift Annuities are particularly attractive and beneficial to older people.

Another life income plan which may be more attractive to people in their middle, more productive years is featured in this issue. Learn about the Life Income Contract. Here, again, the tax advantages are worthy of careful consideration if you have a desire to benefit the College. It is a plan whereby you can have your cake and eat it too. In many instances the donor winds up with much more spendable income when all the tax factors are taken into consideration.

Wise tax planning between now and the end of 1971 can save taxes this year and in the future. Our year-end mailing provides a helpful booklet entitled, "Year-end Tax Strategy." Your desire to help support this work is the most important thing to us. Once deciding to contribute, you will want to plan your gift to take maximum advantage of tax savings available. I'd like to discuss this with you personally, if you wish.

Thank you for your continuing interest in your College and your generous support of our work during 1971.

From all of us here to you and your family, best wishes for a happy holiday season and all the best throughout the New Year.

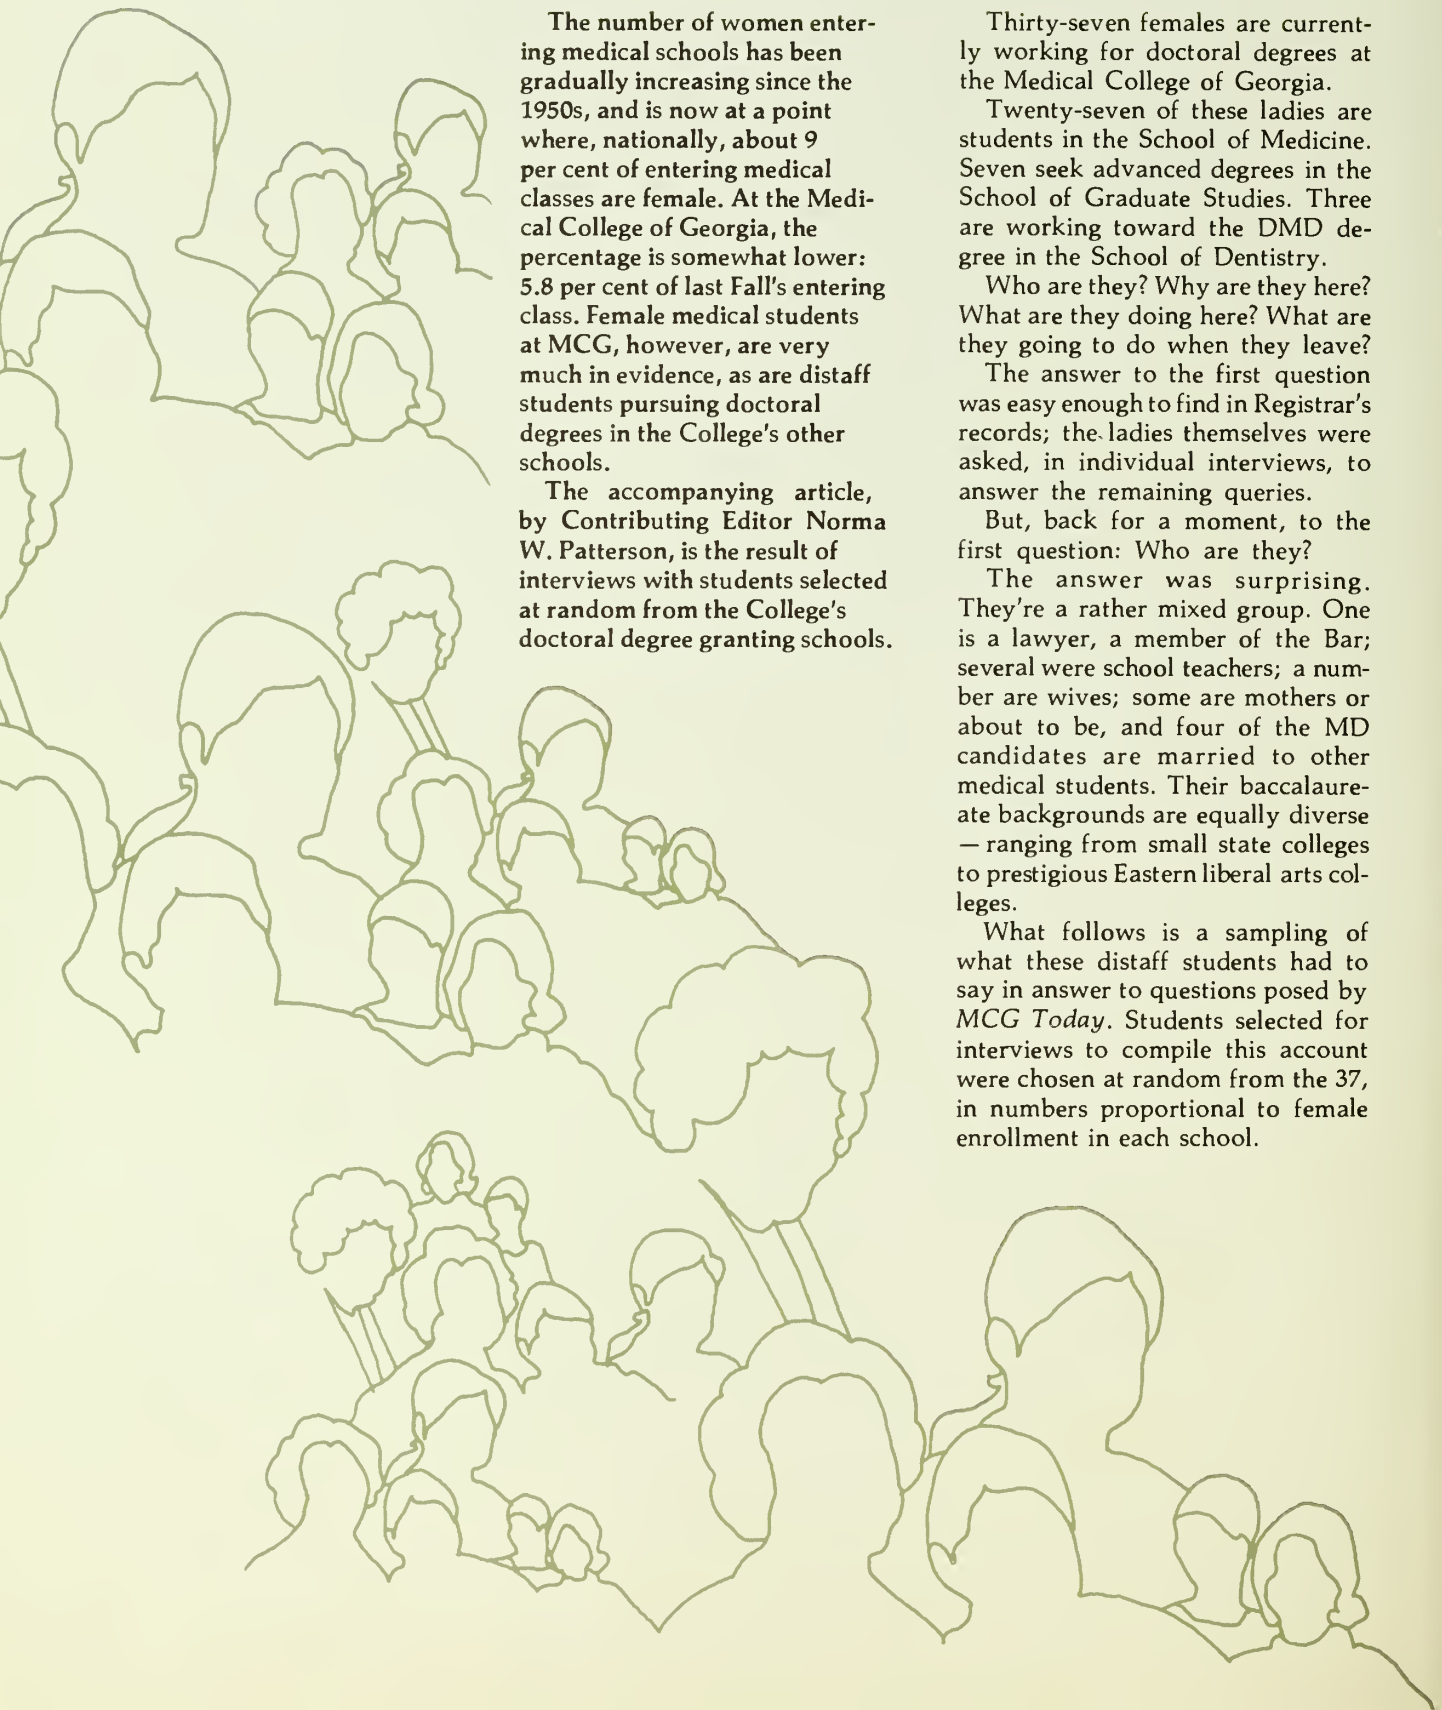
Distaff Doctoral Candidates



The number of women entering medical schools has been gradually increasing since the 1950s, and is now at a point where, nationally, about 9 per cent of entering medical classes are female. At the Medical College of Georgia, the percentage is somewhat lower: 5.8 per cent of last Fall's entering class. Female medical students at MCG, however, are very much in evidence, as are distaff students pursuing doctoral degrees in the College's other schools.

The accompanying article, by Contributing Editor Norma W. Patterson, is the result of interviews with students selected at random from the College's doctoral degree granting schools.

Thirty-seven females are currently working for doctoral degrees at the Medical College of Georgia.

Twenty-seven of these ladies are students in the School of Medicine. Seven seek advanced degrees in the School of Graduate Studies. Three are working toward the DMD degree in the School of Dentistry.

Who are they? Why are they here? What are they doing here? What are they going to do when they leave?

The answer to the first question was easy enough to find in Registrar's records; the ladies themselves were asked, in individual interviews, to answer the remaining queries.

But, back for a moment, to the first question: Who are they?

The answer was surprising. They're a rather mixed group. One is a lawyer, a member of the Bar; several were school teachers; a number are wives; some are mothers or about to be, and four of the MD candidates are married to other medical students. Their baccalaureate backgrounds are equally diverse — ranging from small state colleges to prestigious Eastern liberal arts colleges.

What follows is a sampling of what these distaff students had to say in answer to questions posed by *MCG Today*. Students selected for interviews to compile this account were chosen at random from the 37, in numbers proportional to female enrollment in each school.

A Sampling of Views & Goals

Libby Blanton

Libby Blanton is a fourth-year medical student. Her husband, Rodney Blanton, is also a fourth-year medical student. The couple expects a first child in February. In January they will go to Columbus for internships.

Today: **Why and when did Libby Blanton decide to become a physician?**

"Ever since I've been old enough to talk, I've wanted to be a nurse, a doctor or a veterinarian. I decided that nursing was not quite enough for me. Neither was veterinary medicine. So, I came to medical school.

"I guess I finally made the decision when I was a junior in college . . . ."

Today: **Do you have a specialty in mind?**

"Yes. My husband and I both are going into family practice for a few years and really make up our minds . . . . Chances are, I'll probably end up doing a lot of pediatrics, but not exclusively."

Today: **Did the fact that you are a woman influence your choice?**

"I like to think not. Most people automatically expect all females to go into either pediatrics or a non-contact specialty like radiology or anesthesiology. . . . But I'm interested in pediatrics because I really enjoy it — maybe being a woman influences this though."

Today: **Is family life compatible with a practice?**

"It's going to be hard for me, but then I'm a firm believer in the fact that you can do anything you really want to do, and this is one of the things I want most."

Today: **Do you feel a woman MD, out of necessity, should be married to a doctor?**

"It would be easier on both parties because I can't quite comprehend how any man not in medicine could understand the hours, dedication and obligations that are involved in medicine."

Today: **During the time you've been here, have you felt any discrimination as a woman?**

". . . . I've never really found anybody who seems to be prejudiced toward it in the sense that there is any favoritism because you're a female; there hasn't been any really out-and-out hostility as far as that goes."

Marilyn Russell

Marilyn Russell is a first-year dental student who received her BS degree in Dental Hygiene this June from the Medical College of Georgia. Originally from Michigan, Marilyn now calls Augusta home after being stationed at Fort Gordon for three years in the Army Dental Corps.

Today: **Why dental school?**

"After I completed my tour of service, I began studying dental hygiene here, and the more I got interested in dentistry, the more knowledge I wanted to gain in this field. So, I applied to the school and was accepted for this Fall's class."

Today: **Do you plan to specialize?**

"I've given thought to it, and if I do, I feel it will be in the field of periodontics (the study of tissues which are the supporting structures of the teeth). It's in line with dental hygiene, and I don't ever want to push this into the back of my mind. I plan definitely to be involved in a teaching situation as well as a part-time practice."

Today: **As a woman, have you**

971 Dental Recognition Day

Dental Recognition Day ceremonies at the Medical College last month included presentations by (from left) Dr. Gordon Watson, executive secretary of the American Dental Society; Dr. Alvin L. Morris, vice president of the University of Kentucky; and Dr. John C. Greene, director of the Division of Dental Health, USPHS. The three founding faculty members of the school (below) were also active in the ceremonies. They are (from left) Dr. Judson C. Hickey, dean; Dr. Thomas Zwemer, associate dean; and former associate dean Dr. Louis Boucher. Dr. Boucher has since become Dean of Dentistry at Farleigh Dickinson University.

November 8, 1971 Dental R

Five years of progress at the Medical College of Georgia's School of Dentistry was celebrated November 8, with special School of Dentistry Recognition Day ceremonies.

Developments that led from an initial beginning of three faculty members in a mobile home to today's nationally recognized faculty and facilities were highlighted during a day-long program at the new School of Dentistry Building.

Three programs were held during the day, and tours of the new facilities were conducted. The programs included recognition ceremonies, a scientific program and a student-sponsored social event in the evening.

Several hundred representatives of dentistry in the State and region and other guests took part in the day's activities.

Keynoting the recognition ceremony were Dr. John C. Greene, assistant surgeon general of the U. S. Public Health Service and Dr. Alvin L. Morris, vice-president of the University of Kentucky.

President Harry B. O'Rear presided. Also present were Dr. George Simpson, chancellor of the University System of Georgia; Mayor Millard Beckum of Augusta; Dr. Gordon Watson, executive secretary of the American Dental Association and Dr. Harry W. Bruce, director, Division of Educational and Research Facilities, National Institutes of Health.

The initial dental school enrollment was 24 in 1969. This year there are 115 students and a faculty of 77 full-time and part-time members. The first class will be graduated in the spring of 1973.

New basic science facilities for dentistry, located in the Research and Education Building, feature individual student study and laboratory areas and classrooms with adjoining clinical dental facilities to enhance the correlation of basic and clinical sciences.

In the new School of Dentistry Building, there is a planned environment in which the dental student, in effect, maintains his own dental office. Dental students work together and with dental hygiene and dental assistant students in the training of dental health teams.

Correlation between the basic sciences and clinical work is further enhanced by a faculty which includes 13 educators with doctorate degrees in both a basic science and in dentistry.

The curriculum is now structured to require 12 academic quarters, lasting 36 months. It features treatment of patients combined with courses in human and oral biology beginning in the first week, and extending throughout the entire curriculum. The first class entered under a four year program.

There are opportunities for students to take part in summer enrichment program study, to study and have involvement with the community-at-large and for the motivated student to complete the curriculum in 11 quarters.

The School has also been active in research, advanced education and continuing education. Today, there are advanced programs in oral surgery, orthodontics and pedodontics, and an extensive dental continuing education program. □

22 Per Cent of Medical Alumni Contribute $32,987 to Foundation

A study of giving records for the MCG Foundation Inc. shows contributions from medical alumni during the last year totaled $32,987.30.

The study, covering the period between October 1, 1970 and September 30, 1971, showed that contributions from 599 individuals made up the total figure. There are 2,738 alumni of the School of Medicine, so the 599 contributors make a 22 per cent giving record for School of Medicine alumni.

The $32,987.30 figure includes all gifts made by alumni to the Foundation but does not reflect gifts made to designated funds. These gifts were excluded because they are only managed by the Foundation.

Accompanying this article is a table showing participation of classes and a listing of individual donors by classes. Every effort was made to be correct in these tabulations, but errors have a way of creeping in. So, please let us know if your class or name were not properly recognized, and please be assured we will regret any error.

Gifts made to the Foundation Annual Fund benefit the Medical College in areas where State funds are not available. Some of these areas include faculty recruitment, faculty development, student aid, alumni publications and other areas of pressing need as determined by the President of the College and the Foundation trustees. These funds provide the financial flexibility necessary for the College as its programs advance and expand. □

MCG Radio Network Covers State, Region

The Medical College's **Exploring Health** radio series is currently being broadcast by 56 stations in Georgia and across the Southeast United States.

Broadcasters using the 13-weeks-long series of 5-minute programs include 43 Georgia and South Carolina stations and 13 stations which are members of the Southern Educational Communications Association network.

"Our program is now being heard in Florida, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, Virginia and West Virginia in addition to Georgia," said John W. Stokes, associate director of Institutional Relations.

"We have also had inquiries about the series from the National Public Radio network in Washington, and it seems likely now that this network will add 95 stations, coast-to-coast to the **Exploring Health** listening audience."

The programs were written and directed by Mr. Stokes and produced by Bill Conkright of the Television Services Section.

Faculty and administrative persons who served as resource individuals for the productions are:

Louis A. Wilson, ophthalmology, **Armand Karow**, pharmacology, **Robert Reynolds**, School of Medicine, **J. Graham Smith, Jr.**, dermatology, **Richard E. Gillock**, Hospital and Clinics, **Chaplain Fred Moore**, **Raymond C. Bard**, vice president, **Richard Topazian**, oral surgery, and **George M. Abouna**, surgery. **Henry L. Kitchens**, an alumnus of the School of Nursing from Dublin, Ga., also participated in the project.

The accompanying maps show the scope of the MCG radio network.

dental leaders

The dean of the School of Dentistry and the chairman of the School's Department of Community Dentistry were tapped for national offices in professional organizations this fall.

Dean **Judson C. Hickey** was elected to the presidency of the American Prosthodontic Society at the organization's 43rd annual meeting in Atlantic City. He succeeded Dr. Robert B. Underwood of Elmhurst, Ill., head of the Department of Prosthodontics at the University of Illinois' College of Dentistry.

Dr. J. Earl Williams, chairman of MCG's Department of Community Dentistry, was elected president of the American Association of Public Health Dentists at the 112th annual session of the American Dental Association in Atlantic City October 15.

DISTINGUISHED ALUMNUS Dr. George W. Burnett (left), associate dean of the School of Dentistry, receives the 1971 Distinguished Alumnus Award from W. Austin Davis of the Texas Tech University Ex-Students Association. Dr. Burnett was one of four Texas Tech alumni honored by the Association this year.

nursing

A change in admissions philosophy for the School of Nursing is already paying dividends in increased enrollment.

The enrollment in this fall's freshman class jumped from 43 in 1970 to 72 for this year. Another record was made by the 40 students who transferred into the sophomore class, bringing the total to 73.

Dr. Dorothy T. White, the new dean of the School, credits the new philosophy of the School with the increase by saying, "The admissions and executive committees decided to take a few calculated risks and give more people an opportunity to become nurses.

"For one thing, we eliminated the National League for Nursing Pre-nursing Exam as an admission requirement because we felt that it was a false indicator and a barrier to so many future nurses," she said.

"This was decided, of course, after a careful study of trends in admissions policies at other schools of nursing across the country. While applicants often have acceptable College Entrance Exam Board scores, their NLN Pre-nursing Exam scores were not acceptable. Now, we look at their CEEB scores and their high school achievement record," she continued.

"Then there are special cases, take for instance a registered nurse who completed her education in a hospital nursing school program, but now wants to continue her education and obtain a bachelors degree. For this person, the very fact that he or she was capable of becoming an RN is reason enough for us to believe that they could go on to get a degree."

notables

Claude-Starr Wright, hematology, presented a lecture, "Diseases of Globulins" at the American College of Physicians meeting in Charleston... **Armand B. Glassman**, laboratory medicine, presented "Radioimmunoassay of Digoxin: Application and Methology" and "Quantitative Immunodiffusion: an Adjunct to the Inter-

pretation of Serum Protein" at the ASCP and CAP joint meeting in Boston... **Joe D. Christian, Jr.**, orthopedic surgery, was inducted as a Fellow of the American College of Surgeons at the Clinical Congress in Atlantic City, N. J... **William R. Wege**, dental radiology, was elected treasurer of the American Academy of Dental Radiology at its meeting in Atlantic City... **John M. Alexander**, resident, oral surgery, presented a paper "A Precise Technique for Restoration of Bony Facial Contour Deficiencies with Silicone Rubber Implant" at the American Society of Oral Surgeons meeting in Washington, D. C... **Richard G. Topazian**, oral surgery, was guest lecturer at the Canadian Society of Oral Surgeons meeting in Ottawa, Canada.

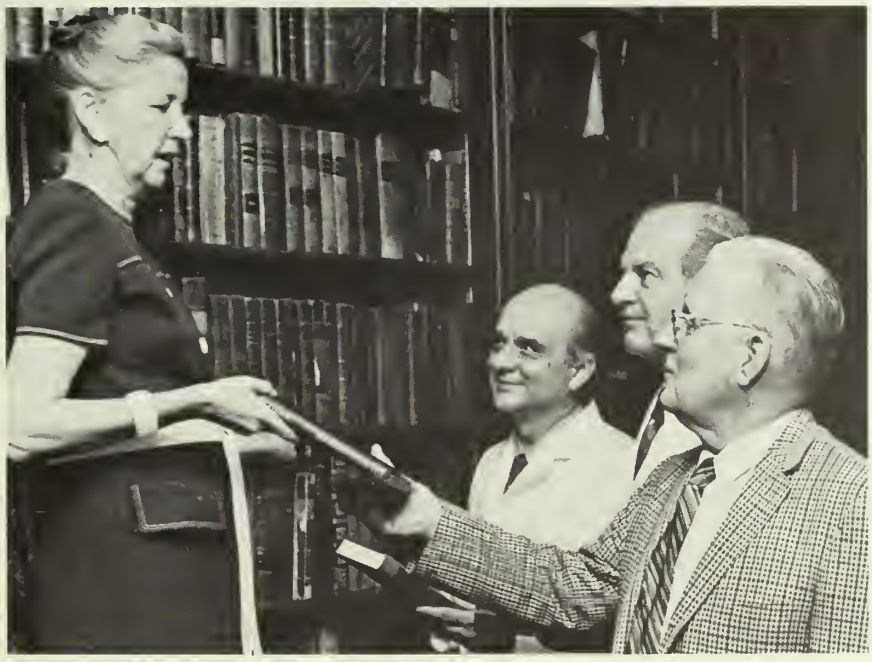
Edward Bresnick, cell and molecular biology, spoke to the Richmond County Medical Society on "Basic Sciences, a Boon or a Boner". He also lectured to the biology students at Georgia College on "Mechanisms of Chemical Carcinogenesis"... **Chuck Ogburn**, third year medical student, and president of the Student AMA, represented MCG at the Association of American Medical Colleges convention in Washington, D. C., Oct. 28-31... **Jasper P. Lewis, '66**, medicine, presented "The Selective Inactivation of an Erythropoietin-generating Factor" at the American Association of Clinical Chemists meeting in Seattle, Wash.

Donald F. Bowers, pedodontics, was elected vice president of the Georgia Society of Dentistry for Children at its recent meeting. He is also program chairman for the 1971 annual meeting... **Eugenia Lee**, nursing and graduate studies, is among those chosen Outstanding Educators of America for 1971. Each year those chosen outstanding educators are featured in a national awards volume — Outstanding Educators of America... **Edward S. Bronstein**, obstetrics and gynecology, has been appointed by Governor Jimmy Carter to represent the Medical College on a special council on Family Planning. He attented the first meeting at the Capitol in August... **Zachary M. Kilpatrick, '59**, gastroenterology, was recently granted fellowship in the American College of Physicians... **Mrs. Dorothy Buffington**, nursing, has been appointed associate director of the project, "Planning for a Statewide Continuing Education Program in Nursing for Georgia".

Paul G. McDonough, ob-gyn, was visiting professor at Riverside Hospital, Newport News, Va., where he presented a lecture on "Office Problems in Gynecologic Endocrinology"... **Kenjiro Shirasawa**, pathology, presented a paper "Ultrastructural Localization of Ferritin-conjugated Anti-fibrin/fibrinogen in Platelet Aggregates of Artificial Thrombi" at the Second Congress of the International Society on Thrombosis and Haemostasis in Oslo, Norway. Dr. Shirasawa returned to Japan from Oslo after completing four years as a visiting fellow in the MCG Department of Pathology. The paper was co-authored by **Betty P. Barton** and **A. B. Chandler**... **Jean M. Tyler**, medicine, presented a paper on "Stimulation of Pancreatic Glucagon Secretion by Glucosamine" at the 31st annual meeting of American Diabetes Association in San Francisco.

Leland D. Stoddard, pathology, discussed "Malignant Hypertension" as a guest lecturer at the University of Colorado Medical Center, Denver. He also participated in the Executive Committee meeting of the International Academy of Pathology in Cincinnati... **John T. Harper, '71**, and **John P. Stewart, '71**, graduates of the School of Medicine, were among ten in the nation to receive the Sheard-Sanford Award and the Bausch & Lomb commemorative medal from the American Society for Clinical Pathologists.

Gary K. Best, cell and molecular biology, presented three papers at the American Society for Microbiology meeting in Minneapolis, Minn. The papers were: "**In Vivo** Toxicity of Cell Wall Fractions of **B**lastomyces Dermatitidis" co-authored with **Rebecca Cox, J. Fred Denton**, and **Luther R. Mills**; "Effect of Temperature on Cell Walls of **B**acillus Psycarophilus" co-authored with Stephen J. Mattingly; and "Non-enzymatic Lysis of Cell Walls of Bacillus Psycarophilus"... **Mary Jo Carter**, infectious diseases, presented a paper "A Microtiter Method for Determination of Inhibitory and Bactericidal Concentrations of Antibiotic Combinations" at the American Society for Microbiologists meeting in Minneapolis... **Paul D. Webster**, gastroenterology, spoke to members of the McDuffie County Medical Society on "Ascites — Diagnosis and Therapy"... **Louis A. Wilson**, ophthalmology, attended the 1971 Section Meeting of the American Medical Association in Atlantic City, participating in discussion of a paper on Adenovirus Type 8 Keratoconjunctivities in the United States.



SOCIETY GIFT Miss Sadie Rainsford, Librarian, accepts a volume from a set of historical books presented the Library by Dr. Julian K. Quattlebaum, '21, of Savannah. The books are the writings of Dr. John B. Murphy of Mercy Hospital, Chicago, and are entitled **Surgical Clinics of John B. Murphy, MD**. Participating in the presentation were (from left) Dr. Robert A. Liebelt, associate dean of Medicine, Dr. Curtis Carter, '38, acting dean, and Dr. Quattlebaum.

Nelson, Harvey S. Wages, '67, Dorothy A. Hahn, Ezzat M. Aziz** and **Don S. Freedman**, "A Complication of Fetal Scalp Blood Sampling", American Journal of Obstetrics and Gynecology, 110: 737-8, 1971... **Thomas G. Muldoon**, endocrinology, "Characterization of Steroid-Binding Sites by Affinity-Labeling. Further Studies of the Interaction between 4-Mercuri-17 Beta-estradio and Specific Estrogen-binding Proteins in the Rat Uterus", Biochemistry, 10: 3780, 1971.

grants

Edward Bresnick, cell and molecular biology, from the National Institutes of Health, $124,685 for a three-year study of "Pharmacology and Toxicology of Drug-Chromatin Interactions"; from the Damon-Runyan Cancer Fund, $20,000 to study "Induction of Liver Benzpyrene Hydroxylase by 3-Methylcholanthrene and Derivatives"; $11,353 from the American Cancer Society to study "Benzpyrene Hydroxylase and Carcinogenesis"; and $30,000 from the Pharmaceutical Manufacturers Association Foundation, Inc. for a two year study of the "Ontogenesis of the Drug Metabolizing System".

Hazel Ann Hutcheson, nursing, $9,350 from the Medical and Child Health Service for a course, "Nutrition in Maternity and Infant Nursing Care"... **Robert B. Greenblatt**, endocrinology, for endocrinology research, $8,367 from the Sterling Winthrop Research Institutes; $2,500 from Travenol Laboratories; and $1,000 from the Royal Bank of Canada... **James B. Hudson**, medicine, $17,000 from the Georgia Heart Association for a Chair of Cardiovascular Research for the period July 1, 1971 to June 30, 1972... **S. David Stoney**, physiology, $58,600 from NIH for a three-year period to study "Organization of Motor Cortex".

Norton M. Ross, oral biology and pharmacology, $3,000 from the Colgate Research Laboratories for a Phase I — Phase II clinical study of "Chlorhexidine in the Control of Dental Bacterial Plaque"... **Louis A. Wilson**, ophthalmology, a Federal Drug Administration contract of $25,000 to continue his study on "Contamination in Ocular Cosmetics"...

Robert E. Reynolds, associate dean and **Nancy Thornton, '54**, pediatrics, $12,000 from the Maternal and Child Health and Crippled Children's Services of the Department of Health, Education and Welfare. The grant supports a pilot study of the impact of comprehensive pediatric health services on the health knowledge, attitudes and practices of low income families... **Linda L. Smith**, cell and molecular biology, $16,922 from HEW, National Heart and Lung Institute, for continued research on the "Dissociation of Normal and Abnormal Hemoglobins"... **Gary K. Best**, cell and molecular biology, $16,781 from the Public Health Service, NIH, to continue studies on "Mechanism of Action of Vancomycin".

Dr. Shepeard Retires

About 200 friends of Dr. Walter L. Shepeard met at the Richmond Motor Inn October 1 for ceremonies marking his retirement. Dr. Shepeard was professor and chairman of Medical Technology and professor of Pathology. He served 23 years. A plaque marking the beginning of the Walter L. Shepeard Achievement Awards was presented to Dr. Shepeard at the dinner meeting. Friends and students from across the country have so far contributed $4,799 to endow awards which will be presented annually to one medical student and one medical technology student at the College. Dr. and Mrs. Shepeard (right) and Vice President and Mrs. Raymond C. Bard were among those seated at the head table. Persons wishing to contribute to the Shepeard Fund may send checks made payable to the Walter Shepeard Fund to the MCG Foundation Inc., 1459 Gwinnett Street, Augusta, Georgia 30902.

a life income contract can:

Advance the work of the Medical College
Provide inflation protection
Provide a contribution deduction
Eliminate capital gains taxes
Assure a life income for you and another
Remove transferred property from the taxable estate
Provide sound investment management
Avoid the publicity that often accompanies probate
Increase spendable income

A gift that pays its contributor (and a survivor if he wishes) an income for life is a most effective way to both benefit the Medical College of Georgia and gain some real personal financial advantages. In exchange for a gift, the MCG Foundation Inc., signs a contract to pay the donor an annual income for life. The donor's gift is added to the Foundation's pooled income fund, where it is invested with the funds of others who have made similar gifts. The donor gets his share of the pooled income fund's earnings each year.

To: James C. Austin
Director of Institutional Relations
Medical College of Georgia
Augusta, Georgia 30902

☐ Yes, I would like to get more detailed information about the MCG Foundation pooled income plan. Here's the information you'll need to know to work up a personal plan for me:

_____
name

_____
address/city/state/zip

_____ _____
birth date 2nd beneficiary birth date

_____
amount of contemplated gift

Dean's Page

Raymond C. Bardi

Dr. Bard, vice president of the Medical College, also serves as acting dean for the schools of Allied Health Sciences and Graduate Studies. He has been a major planner of programs for both these schools at MCG and has been active nationally in allied health professional organizations. He was recently named president-elect of the national Association of Schools of Allied Health Professions and will assume leadership of that group next year.

Physicians, dentists, and nurses — almost everyone knows something about their functions and education, yet most people are largely uninformed about the other members of the health care team; those referred to as allied health professionals. At the Medical College of Georgia, two schools are involved in allied health education — undergraduate programs are administered by the School of Allied Health Sciences, while graduate programs are under the aegis of the School of Graduate Studies.

In 1968, five baccalaureate programs were organized into a single administrative entity — the School of Allied Health Sciences. For a number of years, programs in medical technology, medical illustration, medical record science, and radiologic technology had been active. The fifth program, dental hygiene, was launched in 1967 with the able assistance of the new School of Dentistry faculty that was being assembled. In 1971, the Department of Physical Therapy enrolled its first class. In 1972, the Department of Occupational Therapy will receive its first students.

The School of Graduate Studies is also active in allied health education, awarding the Master of Science degree in Medical Illustration, one of only four such programs in the nation. A new degree, Master of Health Education, has been authorized; this program will prepare teachers for two and four-year college programs in the allied health sciences. Numerous baccalaureate graduates from allied health schools earn the Master of Science and Doctor of Philosophy degrees in the basic health sciences as advanced preparation for service on the health care team.

During the next few years, allied health student enrollment will expand as will the types of programs in operation. The factors limiting student expansion are the resources available: learning centers (lecture and classrooms, clinical facilities) and faculty. University System support of these programs has been generous, but federal support continues to be meager. Until additional federal resources are made available, future progress will be slow.

Such a situation, however, does not inhibit meaningful planning and reasonable aggressiveness. Development of recognized programs continues; thus, a department of respiratory therapy is under consideration. Emerging allied health professions, such as nuclear medicine technology, are receiving close attention prior to program implementation. Programs for mental health care professionals must be devised and activated if this important area of human malfunction is to receive improved care.

Currently under vigorous study, hopefully for activation in 1972, is a program to graduate primary care physician assistants. Such graduates will assist primary care physicians in a variety of medical care environments, including the practitioner's office, the patient's home, in hospitals and clinics. A number of these graduates will choose to become medical specialty assistants in pediatrics, obstetrics, orthopedics, etc., but the basic program will initially provide generalists to maximize service to primary medical care. Simultaneously with this development, it is anticipated that the School of Medicine will implement the family practitioner program which, with the primary care physician assistant program, will provide a new working arrangement for health care.

Careful attention is being devoted to expansion of the duties performed by all allied health professionals. With increasing demand for health care, it is reasonable to establish which duties, currently performed by physicians and dentists, can be delegated to properly qualified allied health professionals. More and more, doctors will delegate authority to other members of the health care team while retaining full responsibility and dedicating themselves to the tasks requiring highly advanced skills. Such a shift in work assignments is indicated if the health care system in this nation is to be preserved while also serving an increasing number of people under a variety of economic arrangements.

In Georgia, with its highly effective University System for higher education, a coordinated program in health education is possible and feasible. The appointment of Dr. Harry B. O'Rear as vice chancellor for Health Affairs indicates System recognition, not only of educational and state-wide challenges, but also the capability of moving forward rapidly. Viewed broadly, all forms of health education in Georgia will progress effectively with relatively small investment of additional resources when compared to the vast benefits to be derived. □

Medicine

1911

Jack Guy Standifer of Blakely is now a great grandfather. He and Mrs. Standifer celebrated their 57th wedding anniversary last September.

1918

Edgar R. Pund, former president of MCG, lives in Seneca, S. C. He retired and was named President Emeritus in 1960.

1919

Theo M. Yates has been retired for ten years. He says his class started out with 32 members, but that only eight graduated. Dr. Yates was a medical missionary in China for 19 years, and then he was in the Medical Corps for three years. Then for 14 years he was with the VA in the United States. He lives in Columbia, S. C.

1924

R. C. McGahee is a private physician specializing in pediatrics. He is president Emeritus of the Georgia chapter of the American Academy of Pediatrics.

1926

Hubert Hiram Blanchard practiced internal medicine and psychiatry in Wisconsin from 1930 until 1968. He returned to Georgia in July, 1968. Since then, he has practiced psychiatry in health centers of Spalding, Henry and Peach Counties. He lives in Barnesville.

1929

Samuel F. Rosen was recently elected vice-chairman, section on dermatology, Southern Medical Association.

1930

Andrew H. Hinton retired from active practice last January due to poor health. He says he would like to hear from classmates and would like to see the class have a reunion in the near future.

1931

John D. Bird will retire from the active practice of medicine December 15. Dr. Bird has practiced for many years in Wheeling, W. Va.

1932

Lewis H. Oden, Jr., is a retired Air Force colonel. He worked for a time in the Health Center at Florida State University, but is now retired again. While in the Air Force, he was awarded the Legion of Merit, Bronze Star and the Air Force Commendation Medal with two oak leaf clusters. He is now living in Blackshear, Ga. **Raymond H. King** retired from active practice several years ago and is now farming half of the year in Spruce Pines, N. C. The rest of the time, he stays 'back home' in Jacksonville, Fla. His address there is 1707 San Marco Blvd., 32207.

1933

Virgil S. Steele is now retired. He practiced eye, ear, nose and throat at Brooks General Hospital in San Antonio, Tex., and also had a private practice in San Antonio. He lives in Eastman, Ga., and practiced there for a time before becoming disabled. **Herman L. Dismuke** lives in Ocilla. **Aaron C. Ward** of Augusta is a retired lieutenant colonel in the Army Reserve. Ill health forced his retirement; he says he just takes it easy now. **Allan G. Thurmond** lives in Augusta.

1936

W. Steve Worthy is in active practice of obstetrics and gynecology in Carrollton. **T. Schley Gatewood** has just returned

from Tokyo where he attended an international conference on sterility and fertility. **Lynn M. Huite** has been practicing in Monroe since 1939. He has two married sons and a daughter who is a senior at West Georgia College.

1937

Sam E. Patton, says, "all is well in Macon."

1938

Frank Stelling is chief surgeon at Shriners Hospital, Greenville, S. C., and a senior partner in the Piedmont Orthopedic Clinic. He is a member of the American Board of Orthopedic Surgeons and in October was made an honorary member of the Georgia Orthopedic Society.

1939

Tracy Levy of Miami, Fla., is still in active service as a medical officer in charge, US Public Health Service. He is attending physician at the University of Miami Medical School and is a Fellow in the American College of Physicians. **Harold M. Smith** is proud of his first grandchild. His daughter, Suzanne Phillips, gave birth to a boy last June. Dr. Smith lives in Savannah.

1940

James W. Clower has been practicing ophthalmology for 20 years and represents this specialty on the Council of Specialty Medicine for the Florida Medical Association. He has been chairman of the Medical Advisory Committee of the Bureau of Blind Services for two years. Dr. Clower lives in Daytona Beach, Fla. **H. W. Coleman** lives in Avon Park, Fla.

1941

Joe J. Arrendale of Douglasville and his wife Catherine, along with **Ray Denny**, '38, and his wife, Evelyn, toured Europe last summer. **Donald R. McRae, Jr.**, lives in Augusta. He and his wife have four sons. One is a junior in the MCG School of Medicine. Another is a senior at Duke Medical School. Another is a freshman at the University of Georgia taking pre-med courses, and another is a senior at the University of Georgia doing pre-dental work. **Herman K. Moore** has been in family practice 25 years. He is a member of the Academy of Family Practice. He and his wife have been married 28 years and have five children and one grandchild.

1942

Coleman Mopper is a clinical associate professor of Dermatology at Wayne State University School of Medicine, Detroit. **David Robinson** is entering into the 25th year of practice of radiology in Savannah. He notes: "I was one of the original residents under Dr. L. P. Holmes, and in a recent visit to Augusta was astounded with the many advances and changes that have taken place both at the Medical School and the University Hospital. I regret having missed the 25th reunion of my class and hope that we may have a 30th reunion in 1972. I am proud of the wonderful progress that is being made in the Medical College and wish it continuing success."

1943

Glenn E. Seymour is in the practice of surgery and gynecology in Albany. **Albert Rosenberg** has ended his private practice of pediatrics in Atlanta and is now working in Student Health Services at the Georgia Institute of Technology. His address is 275 5th St., N. W., Atlanta, 30318.

1944

Jack T. Harper is associate professor and clinical assistant at the University of Georgia Health Service. He was in private practice for 20 years in Illinois. **H. C. Derrick, Jr.**, has been in general practice in Lafayette, Ga., for 25 years. He has been Mayor for 13 years. He has two children, one a senior at the Medical College. **O. F. (Buddy) Deen, Jr.** has been in the practice of pediatrics for 22 years in Tampa, Fla. He and his wife have three children. **William H. Galloway** has been in practice with the Bartholomew Group in Atlanta since 1955.

Elected — J. Willis Hurst, '44, chairman of the Department of Medicine at Emory University School of Medicine, was elected president of the American Heart Association at the group's recent annual meeting in Anaheim, Calif.

1945

Ira E. Bell is past president of the North Carolina Chapter of the American College of Radiology. He is also a past member of the Board of Trustees of the Catawba Technical Institute and past chief of staff at Catawba Memorial Hospital. Dr. Bell is chief of Radiology at Catawba Memorial. He and his wife have four children. **Augustin S. Carswell, Sr.** was president of the Georgia Orthopedic Society during 1970-71. **Tom Edmondson** lives in Tifton. **M. H. Mason** is in general practice in Duluth, Ga. He has been in Duluth since 1950 and is part owner of Sky Valley, the only ski slope in Georgia. His oldest son, Miles H. Mason, III, will graduate in June from MCG.

1946

S. A. Heaton, Jr. is an emergency room physician at Hall County Hospital in Gainesville. He retired from the Navy last July. **T. W. Rentz** of Colquitt writes: "absolutely nothing outstanding to report in 24 years of general practice." **Asa W. DeLoach**, chief of Psychiatric Services

at the Presbyterian Hospital in Dallas, Tex., has become interim chairman of the Department of Psychiatry at the University of Texas Southwestern Medical School. Dr. DeLoach has also been appointed professor of Psychiatry and chief of psychiatry at Parkland Memorial Hospital.

1947

Carol Graham Pryor is chief of Obstetrics & Gynecology at St. Joseph's Hospital, Augusta. She and her husband have recently returned from a trip to Spain and Portugal. **Arthur J. Crumbley** is practicing medicine at College Park. **Roy T. Ward** is practicing medicine "in the town of my birth." He lives in Watkinsville. **James R. Jones, Jr.** specialized in obstetrics and gynecology and is practicing in Orlando, Fla.

1948

Victor Moore is professor in Medicine at MCG and is director of Medical Education at University Hospital. **Charles Henley Bruce** is chief of Obstetrics-Gynecology at the Williamson Appalachian Regional Hospital, Williamson, W. Va. He is also a member of the Highlands Clinic in Williamson. **R. E. Roberts** is practicing medicine at East Point.

New XO — Capt. James S. Maughon, '49, has been assigned as executive officer to the Pensacola Naval Hospital, Pensacola, Fla. He is also chief of Surgical Services and head of the Thoracic Surgery Department at the Hospital.

1950

Dorothy E. Brinsfield has been promoted to full professor of pediatrics at Emory University. She continues in an additional capacity as instructor in physiology. A specialist in the field of heart defects and cardiac anomalies, she has been on the Emory faculty since 1953.

1951

G. E. Mixon is now serving as president of the Georgia Academy of General Practice. He was president-elect in 1970-71 and vice president in 1969-70. He is a Diplomate of the American Board of Family Practice. He lives in Ocilla.

1952

H. R. Frost lives in Swainsboro. Gordon W. Jackson lives in Macon. **David S. Sowell** reminds members of the Class of '52 of a reunion planned at the MAG meeting.

1953

James K. Moss is clinical associate professor of Pediatrics at the University of Florida College of Medicine. He is president of the Northeast Florida Pediatric Society. **Roy Witherington** is associate professor of Urology at MCG on a part-time basis and is in private practice of urology in Augusta. **Jack H. Raulston** lives in Boynton Beach, Fla. He says he needs an associate. The climate and fishing are good, but he can't find time to enjoy them. **Daniel S. de La Penha** of Hollywood, Fla., is a member of an eight-man anesthesia group in one of the fastest growing areas of the US. He says that between hunting, fishing, tennis and skeet shooting, he hardly has the time to practice medicine. His oldest daughter is going to the University of Georgia in Athens, and his youngest is a junior in high school, and she plans to go into music and drama. Both of his girls were born in Augusta. His wife is a professional artist who now has work in the traveling "Mangrove Show". **Sanford A. Shmerling** has been appointed clinical assistant professor of Medicine at Emory University.

1954

A. D. Wright, Jr. is practicing dermatology in Gainesville. **W. R. Domingos** of Macon was selected this year for Fellowship in the American College of Chest Physicians. **Frank C. Wilson** is chairman of the Department of Orthopedic Surgery at the University of North Carolina School of Medicine. In 1969, he had the North American Traveling Fellowship to England. **Charles R. Hatcher, Jr.**, has been appointed professor of Surgery and chief, Division of Thoracic and Cardiovascular Surgery, Emory University School of Medicine and Emory University Clinic.

1955

James Z. Shanks has relocated his office for practice of internal medicine to 5675 Peachtree-Dunwoody Road, N. E., Atlanta. It's across from Northside Hospital. **J. H. Segars** recently attended, with his wife Anne, the International College of Surgeons meetings in Hamburg, Germany. They live in Lenoir, N. C. **C. Daniel Cabaniss** is chairman of the Department of Medicine and acting director of Medical Education at the Medical Center in Columbus. He was in group practice of internal medicine in Atlanta. **M. L. Johnson, Jr.** is in general practice in Bowdon.

1956

Leonard L. Cotts is living in Atlanta. **Milton B. Satcher** was inducted as a fellow in the American College of Surgeons in October. He is now practicing orthopedic surgery in Atlanta. **Ronald F. Galloway**, Augusta thoracic surgeon, has proven his expertise in other realms as well. He has now had an article accepted by Medical Economics.

1957

Jack B. Edwards, Jr. has been in the practice of surgery in Cornelia since August, 1961. **William C. Cook, Jr.** lives in Atlanta. **Otis J. Woodard, Jr.** is in the process of limiting his psychiatric practice to family therapy in Albany. **Barbara Castleberry Carlton** lives in Wauchula, Fla., where she built and opened the Doctors Center last March. She has three associates, one GP, one ob-gyn and a surgeon. She calls it, "a little Mayo Clinic in Wauchula, Fla." She was also invited to play in the first Disneyworld pro-am golf tournament. She is certified by the American Board of Family Practice. **William J. Branan**, Atlanta, attended the meeting of the 1971 International Congress of Pediatrics in Vienna, Austria. Following the meeting, he and Mrs. Branan spent three weeks touring Europe.

1958

Louis J. Jacobs is director of Psychiatric Residency Training at the hospital in Milledgeville. **Robert W. Oliver** has been in the practice of general surgery in Dublin since July, 1970. He was a GP for five years before going to Macon and Talmadge hospitals for a general surgery residency. He served in the Navy for two years in Vietnam and in Beaufort, S. C. He is a Diplomate of the American Board of Surgery. He and his wife have three children.

1959

Sam L. Goolsby Hoover is in the practice of anesthesiology at Hutchinson Memorial Hospital, Fort Oglethorpe. He announces the birth of a son, **David Wayne Hoover** on Nov. 3. **William Ralph Bottoms** has been elected chief of staff of Union General Hospital in Blairsville. **Leonard Fishman** has been appointed clinical assistant professor of Medicine at Emory University. Using the pen name of Brian Deen, **Herbert D. Smith**, Savannah psychiatrist, has now turned author. His recent novel, **The Elements So Mixed**, has received wide acclaim. In it, he has managed to produce a highly descriptive chronicle of life in the South in the aftermath of the Civil War. This book is published by Vantage Press of New York.

1960

Thomas J. Yeh, says, "The open heart surgery program at Savannah has been coming along fine. We have done one to two cases a week of open heart surgery. We started coronary artery surgery eight months ago." He attended a symposia in thoracic and cardiovascular surgery in Yugoslavia and Italy in May. **Stanley P. Aldridge** is practicing internal medicine in Decatur. **Milton Irvin Johnson, Jr.**, lives in Macon and was certified by the American Board of Family Practice last February. **John R. Andrew** is a "mountain doctor" at Ellijay, 16 miles from the nearest town. He says, "We are growing our own food and studying herbs." **Randall E. Couch** is in general practice in Lavonia. Dr. Couch writes: "I enjoy your publication. MCG's efforts to contact and update alumni are appreciated, though few of us have the opportunity to schedule and participate in the postgraduate programs planned for our benefit." **I. Gene Schwarz**, former psychiatrist at the University of Cincinnati College of Medicine, has been appointed assistant clinical professor at the University of Colorado School of Medicine. A Diplomate of the American Board of Psychiatry and Neurology, Dr. Schwarz received his specialty training at the University of Cincinnati and studied for five years with the Chicago Institute of Psychoanalysis. He and Mrs. Schwarz make their home at Route 3, Box 394, Golden, Colo.

1961

William N. (Bill) Postell, Jr. is director of the Cardiopulmonary Program in the Greenville, S. C. Hospital System. **George Alan Playford** is in a five-man anesthesia group, all board certified. **William H. Meeks** lives in Augusta. **William C. Maloy** is assistant professor of Medicine (Cardiology) at the Medical University of South Carolina in Charleston.

1962

Gene Waller is in the practice of general surgery at Anderson, S. C. and has been there since completion of his residency training in general surgery at the Medical College of South Carolina. He said he thoroughly enjoys the magazine. **Roger Bates** is in private practice of general surgery in Waycross and recently attended a post-graduate course in Boston for three weeks. **Melvin L. Hirsch** and his family are now living in Munster, Ind. Dr. Hirsch practices internal medicine and is director of the Nuclear Medicine Department at Our Lady of Mercy Hospital in Dyer, Ind. **G. David Maxwell** has returned to civilian life after nine years with the Navy. He is now in practice with Drs. John McPherson and Charles Thomas in Athens. He and his family are residing at 350 Duncan Springs Rd., Athens, 30601. **Walker C. McGraw** is now in the practice of general surgery and industrial medicine with the Howell Industrial Clinic, Atlanta. He was certified by the American Board of Surgery in February.

1963

Iverson W. Joines will enter the private practice of medicine and cardiology in Atlanta next July. He is now engaged in the second of two years of a fellowship in cardiology in the Department of Medicine, Emory University School of Medicine. He has finished an internal medicine residency in the Department of Internal Medicine at Emory University, and was recently certified as a Diplomate of the American Board of Internal Medicine. He and his wife are the parents of two children. **Clarence W. Donald, Jr.** is in the practice of pediatrics in East Point. **James May** is chief resident in thoracic-cardiovascular surgery at the Medical University Hospital in Charleston, S. C. **Armand A. De La Perriere** is in obstetrics and gynecology practice in Atlanta in association with Drs. Vernon Hendrix and **Philip Bartholomew**. **Paul N. Erckman** is in the private practice of pediatrics in Greenville, N. C. He was appointed assistant clinical professor of Pediatrics at the School of Medicine, East Carolina University, Greenville, N. C., and he is a Fellow of the American Academy of Pediatrics. **Lawrence Crimmins** has been in general practice in Albany since completion of an internship at Charity Hospital in New Orleans in 1964. **Cleveland Thompson** is a major, stationed at Tyndall AFB, Fla. Previous to this assignment, Dr. Thompson was stationed at Cam Ranh Bay, Vietnam. He is the son of **Cleveland Thompson, Jr.**, '49, of Waynesboro. His wife, Marguerite, is the daughter of **Wm. K. Philpot, '28**, of Augusta.

1964

William S. Smith is in the practice of otolaryngology in Atlanta. **Reuben J. Smith** is in the practice of obstetrics and gynecology in Athens. **Jack E. Butterworth, Jr.** has been in private practice of neurology in Bristol, Tenn., since last July. **Brunson M. Salley, Jr.**, is in a three-man group practice of family medicine in Charlotte, N. C. He is immediate past president of the county AAGP and is current AAGP county seminar chairman.

1965

Thomas B. Merritt lives in Orange Park, Fla. He is in private practice of psychiatry in Jacksonville, Fla., and is chief of Psychiatry at the Naval Hospital there. He and his wife have three sons. **W. Ferrel Harper** is in private practice in Albany. He was board certified in general surgery last March. He was appointed director of the area cancer facility in October of this year in Albany. **John D. Reynolds, II**, is presently serving as a major in the Medical Corps. He is serving as a neurosurgeon at the 95th Evacuation Hospital, Da Nang, South Vietnam. **John Dekle** is in private practice of obstetrics and gynecology in Savannah with Drs. John Angell and Darnell Browner. **John McCamy** will have a new book out in mid-72 — **Human Life Styling**. He is working in the Institute of Metabology, Southern Academy of Clinical Nutrition. He says his practice is now totally preventive-oriented. He is giving one-day workshops for physicians and dentists encouraging re-orientation of practices toward prevention. **Gary E. Kaufmann** finished his neurosurgery residency at Parkland Memorial Hospital, Dallas in July and is now in private practice in Atlanta with William W. Moore, Jr., MD and Donald F. Grady, MD. **Carl L. Crawford** is in general practice in Warner Robins, where he is also medical director of the

Hallmark Nursing Home and is vice president of the Houston County Cancer Society. He is also president of the Houston County Association for Exceptional Children which operates Happy Hour School for retarded children from 6 to 18 years of age and Happy Hour Workshop for retarded persons 18 years and older. He is also chairman of the county's Red Cross Blood Program and is on the board of directors of the county Red Cross, the United Giver's Fund and Blue Shield of Columbus. **B. Carter Baldwin** of Macon has opened his office for the practice of dermatology at 1217 Peacock Avenue, Columbus.

1966

William H. Hayes has joined Dr. Hans Peters in the practice of pathology in Columbus. He has also accepted the position of project director for the American Society of Clinical Pathologists. **Sam A. Vickery** is practicing medicine in Commerce. **James T. King, Jr.** is a third year resident in surgery at the Georgia Baptist Hospital in Atlanta. **James R. Gregory** entered the practice of obstetrics and gynecology in Dalton, in July, 1970. He was joined this year by **Harvey S. Wager**. **Forte Rabb** is finishing a residency in dermatology at the University of Tennessee. His plans are to return to Georgia next June. **Robert W. Simmons** lives in Dalton. **William Henry Hayes**, of Cartersville, has entered the practice of pathology with Dr. Hans Peters at St. Francis Hospital in Columbus. Dr. Hayes pursued his internship and residency training at Memorial Hospital in Long Beach, Calif. Dr. Peters will be remembered by many alumni as a former faculty member in the Department of Pathology at MCG. **Joseph V. Morrison** of Savannah has returned to his home town and joined **Milton Mazo, '39**, and **Edwin C. Shephard, '48**, in the practice of pediatrics. Their offices are at #4 Medical Arts Center.

1967

Chappell A. Collins, Jr. is in general practice in partnership with two other MCG graduates in Camilla. He has served as chief of staff at the Mitchell County Hospital and is presently president of the Camilla Chamber of Commerce. He said that they are very interested in having another partner in the clinic. He and his wife, Joyce Mosteller Collins, have three children. **Samuel E. Wood** is in family practice in Goose Creek, S. C. He and his wife have two daughters. **Dale L. McCord** is in a residency in radiation therapy-oncology at the University of Florida. He was a flight surgeon in the Army in Vietnam from 1968-70. He and his wife have one son. **Lambros Rigas** who completed his internship in '63 and his residency in '67 at Talmadge Memorial Hospital is now in the private practice of obstetrics and gynecology in Rome. **Cecil C. Waddell** is a family physician in Alexander City, Ala. He and his wife, the former Judy Watson of North Augusta, S. C., have two children. **Thomas E. Dill** is finishing a pediatric residency at Grady Memorial Hospital in Atlanta. **John C. House** is now in general practice in Winder. He spent three years on active duty with the Army, including a tour of duty in Vietnam.

1968

Jackie J. Cox is presently director of a program training registered nurses as pediatric nurse associates in a community health clinic setting at the Memphis and Shelby County Health Department. He also has a clinical position on the University of Tennessee Medical faculty.

1969

Andrew T. Sheils, Jr. is living in Augusta. **Alfred Colquitt, III**, is in his second year of a residency in orthopedic surgery at Charlotte Memorial Hospital in Charlotte, N. C. **Marion H. Jordan** is an instructor in the gross anatomy lab at the University of South Florida College of Medicine. He completed a general surgery residency at Tampa General Hospital this year and was team physician for the University of Tampa Spartan football team. **George S. Heath** is practicing medicine in Waycross. **Roger Nunn** is serving two years in the Air Force as a medical officer. **James T. Lowe, Jr.** is in his second year as a resident in otolaryngology at Duke University Medical Center.

1970

Donald B. Waters is now in the Air Force stationed in Greenland. **Ronald C. Pirtle** is serving a two year term of active duty at the Glynco Naval Air Station. **Arthur G. Kelly** will begin a residency in pathology in August of 1973 at the University of Florida, Gainesville. He is presently serving in the Air Force at McCoy AFB, Fla. **William D. Daniel** completed an internship at the Naval Hospital, Bethesda, Md., and is doing a residency there. **Ellis L. Malone** is presently serving a three-year tour of duty with the Navy on the USS Raleigh in Norfolk. **Kenneth A. Azar** is doing a residency in psychiatry at Tulane Medical School. He was married to Amelia Chandler last Spring, and they are now living at #611, 3915 St. Charles St., New Orleans, 70115. **A. Lucian Cousins** is a resident in internal medicine at the School of Medicine in Birmingham, Ala. **Randolph R. Smith** is spending 1971-72 in general surgery, and then will begin an ENT residency at Duke University with former MCG alumnus, **Toby Morgan, '67**, and **Jim Lowe, '69**. **John W. Greene** is now serving in the Army. After his tour, continuing through June of 1973, he will then do a pediatric residency. **J. Dorsey Smith** is now on active duty with the Army.

Nursing

1952

Sarah Thelma Beck, '52, retired from the Navy Nurses Corps in 1969 and lives at Rt. 3, McBean. **Fannie Mae Sims Walker**, '56, is doing private duty nursing at Piedmont Hospital in Chamblee. **Eldred Davis Smith**, '58, lives in Brunswick, with her husband, **W. Jack Smith, MD, '59.** They have two married sons. **Lorraine Murray Davis**, '58, and her husband, Reginald M. Davis, MD, '59, live in Jacksonville, Fla., where Dr. Davis is a commander in the Navy. **Gloria Howell Bates**, '59, has lived in Waycross for the past two years where her husband, Robert Bates, MD, '62, is in private practice. The couple has two children. A third child is expected in December. **Eleanor Hunt Rahn**, '59, is a supervisor at the Georgia Infirmary, Inc. at Savannah. She lives in Thunderbolt. **Hazel Smith Mock**, '59, lives in Savannah where her husband is chief x-ray technician for Candler General Hospital, Inc. They have three children. **Linda McNair Johnson**. '59, is assistant director of projects, Department of Continuing Education, Kennestone Hospital, Marietta. **Marty Drew Paulk**, '60, is married to Alan Paulk, MD, '60. They have two daughters and reside in Atlanta. **Mary C. Caldwell**, '61, is Nurse Coordinator (Homemakers) Visiting Nurse Association, Atlanta. **Carolyn Peebles Woodhams**, '62, is looking forward to a "white winter" while living in Cleveland, Ohio, this year. Her husband, John A. Woodhams, MD, is director of Staff Service and Out Patient Clinics and assistant director of Surgery at Huron Road Hospital in Cleveland. **Wilhelmina A. Ralsy**, '63, is a Public Health Nurse at the Evaluation Center, Gracewood State School and Hospital. She also assists in the orientation program for Public Health Nurses in Georgia. Prior to this, she worked for two years in pediatrics at Talmadge Memorial Hospital. **Bonnie Davis Phillips**, '64, is director of nursing at the Georgia Regional Hospital in Atlanta after serving one year as assistant director of Nursing Service. She and her husband, Dan Phillips, who is a third year resident at Grady Hospital, are adopting a child in the near future. **Amanda Hempel Coleburn**, '64, is department head of the Medical Assistants Program at Chesterfield-Marlboro Technical School in Cheraw, S. C. Her husband, Harry F. Coleburn, is a senior customer engineer for IBM. **Sharon Robinson McRae**, '65, is married to C. Phillips McRae of Macon, a sales representative for Will Ross, Inc., and they have one child. **Mary Sellers Haas**, '65, will move to Clarksburg, W. Va., from Leroy, Ohio, in January, 1972. **Elizabeth F. Pond**, '66, of Martinez, is not working at present. She and her husband have two daughters. **Lana Lowery Zarate**, '66, of Mexico City, Mexico, gave birth to twins in August. She and her husband, Dr. Arturo Zarate, have three other children. **Donna Owens Hodges**, '66, is working in the Nursing Program of Angelo State University, San Angelo, Texas. Her husband, Hugh O. Hodges, MD, '69, is in the Air Force, and they expect to return to Georgia next August. They have one child. **Sandra L. Hartsfield**, '67, is on the faculty of the Medical University of South Carolina School of Nursing. **Linda R. Rials**, '67, is married to William J. Rials of Decatur, and they have one daughter. **Genie McGibony Farmer**, '67, is a senior nursing coordinator for MCG's Maternity and Infant Care Project. She said the 1967 class reunion at the Towers Motel in Augusta was "great", with around 18 class members enjoying a luncheon, business meeting, social hour and buffet dinner. **Shelby J. Lacy**, '67, is nurse area coordinator for the Georgia Regional Medical Program in Northeast Georgia, and is also state director for the Georgia State Nurses Association. She is employed at Athens General Hospital. **Meg McNealy**, '68, was named a member of the "Outstanding Young Women of America" for 1971. She sang in "Madame Butterfly" as a member of the Augusta Opera chorus in September and is considering returning to school to get a music degree. **Velma M. Edmonds**, '68, lives in Mobile, Ala. **Sue Diephuis White**, '68, is a public health nurse with the Topeka-Shawnee County Health Department in Topeka, Kan. **Donna Dyer Pavek**, '68, is a nurse anesthetist in Deerfield Beach, Fla., where her husband is an engineer with IBM. **June Hansen Larrabee**, '68, is an instructor at Southeastern Massachusetts University. She earned an MS degree in Medical-Surgical Nursing from Boston University in May and as of April is a member of Sigma Theta Tau. **Terry Romagosa DiGuilio**, '68, is a private duty nurse on a part-time basis since the birth of her daughter in May. She and her husband, an attorney, live in Rochester, N. Y. **Barbara Jones Roper**, '68, is supervisor of the OP Clinic, University Health Service, University of Georgia. Her husband is a second year law student at the University. **Susan Woolf Goodin**, '68, is a clinical assistant at the Texas Woman's University College of Nursing in Dallas. She is also taking graduate work in nursing. Her husband is doing an internship at Baylor University Medical Center. **Edee Norsworthy**, '68, is head of the Trauma Unit at Rancho Amigos Hospital, Redondo Beach, Calif. During the summer she took a camping trip up the west coast through Oregon. **Janette Hearn Miller**, '69, works part-time at Talmadge Memorial Hospital. She and her husband have one child and live in North Augusta, S. C. **Linda Copeland Wessels**, '69, completed a year's work as a school health nurse for area American schools in Livorno, Italy, just two weeks before the arrival of her first child. Her husband is a captain in the Army stationed in Italy. **Patricia Nethery Connell**, '69, is In-Service Education Coordinator at Hutcheson Memorial Tri-County Hospital in Ft. Oglethorpe, Ga. **Linda Klapman Vallejo**, '69, moved to West Columbia, S. C., in October from Long Beach, Calif., where she had worked as a public health nurse in charge of the prenatal and well-baby clinics. **Judy Ann West Black**, '69, is teaching medical surgery nursing, both clinical and classroom, at the Hall School of Nursing in Gainesville. **Patricia Carter**, '69, is working in the Surgical Intensive Care Unit at Talmadge Memorial Hospital and is a graduate student in Medical-Surgical Nursing Clinical Specialist program at MCG. **Mary Warren Judy**, '69, is a staff nurse at the Metropolitan Nashville Health Department. **Lynn McKneely Garrard**, '70, is working as a staff nurse with the Richmond County Public Health Depart-

ment. She was married in January to Thurston Garrard. **Dorothy G. Clark**, '70, completed work for a Master of Nursing Degree at the University of Pittsburgh and is now a nurse clinician at Henrietta Egleston Hospital for Children in Atlanta. **Mary Ellen Byrd Creech**, '70, is a public health nurse for the City of San Antonio, Tex., where her husband is a management trainee with the United Services Automobile Association. **Sharon Webb**, '70, is a full-time student in the masters degree program at MCG, is a part-time staff nurse at Candler General Hospital, Savannah, and is engaged to be married to Dan Butler, a law student at Mercer University. **Evelyn C. Davis**, '70, is working at the Houston, Tex., Public Health Department. **Virginia Sheetz Leet**, '70, is working in the Coronary Care Unit at St. Joseph's Hospital, Augusta. Her husband, Christopher Leet, is a medical student at MCG. **Hope McKelvey Velten**, '70, is a school nurse in Las Cruces, N. M., public schools and works part-time in the Student Health Center at New Mexico State University. Her husband is stationed at White Sands Missile Range. **Lula Faye McMillan Froelich**, '70, is a nurse in the Labor and Delivery section at R. E. Thomason General Hospital, El Paso, Tex. **Pam Grant Black**, '70, is at the Maternal and Infant Care Project at Grady Memorial Hospital, Atlanta. She is also working as a liaison nurse for the Hematology Clinic. **Barbara Hendley Reid**, '70, is a clinic nurse at Grady Memorial Hospital. She was married to Douglas Reid in February. **Marcia Drake McWhorter**, '71, is a nurse at Norfolk General Hospital. Her husband is a naval officer stationed in Norfolk, Va. **Suzette Pollett Huie**, '71, is in the Medical-Surgical unit at St. Joseph's Hospital, Augusta. She married Chris Huie, Jr., in September. **Grayce Andrews Gerlock**, '71, is a part-time staff nurse at the Texas Medical Center, Houston. Her husband is A. J. Gerlock, MD, '63. **Kathryn Guy**, '71, is a charge nurse at the Naval Hospital in Pensacola, Fla. **Janelle Bost Correll**, '71, works in the intensive care unit at Cabarrus Memorial Hospital, Concord, N. C. She and her husband are expecting their first child in March. **Patience Thacker**, '71, is a staff nurse in the Pediatrics Department of Memorial Medical Center, Savannah. **Cynthia Nutt**, '71, is a staff nurse at Piedmont Hospital, Atlanta. **Rita Wolfe**, '71, is in the Navy Nurse Corps and is stationed in Pensacola, Fla. **Mary R. Sanford**, '71, is living in Roswell and is not currently employed in nursing. **Bairan L. Annett**, '71, is in the graduate nursing program at Emory University. **Edna E. Wroe**, '71, is a staff nurse at Piedmont Hospital, Atlanta. **Gloria Galbreath**, '71, is a staff nurse on the orthopedic unit at Piedmont Hospital. **Janice R. Jenkins**, '71, is working in the cardiac care unit at Talmadge Memorial Hospital. Her husband is a third year resident in psychiatry at MCG. She states that the class painting entitled "Visiting Hours" by Cathy McCord will be hung in the student lounge in the School of Nursing. **Kathryn Grey Gatins**, '71, is a public health nurse in Cobb County near Atlanta. She will enter the graduate program at Emory University this year. **Gladys May Temple**, '71, is working with the Richmond County Public Health Department. **David Lee Williford**, '71, is on active duty at Womock Army Hospital, Fort Bragg, N. C. and is attending an operating room nursing course. He is a first lieutenant in the Army and took his basic training at Fort Sam Houston, Tex.

School of Allied Health Sciences

Radiologic Technology

Linda Hart, '70, is living in Northeast Atlanta working as a registered Radiologic Technician at Piedmont Hospital. **Denise D. Creek**, '70, is now running the cardiovascular lab at the University Hospital Radiology Department.

Medical Record Science

Carole Ann Simpson Nolan, '67, is assistant Medical Record Librarian at Charlotte Memorial Hospital, Charlotte, N. C. She is married to Nick F. Nolan, who is a student at the University of North Carolina at Charlotte. **Carol Jean Berry**, '70, is employed at the Cabarrus Memorial Hospital in Concord, N. C. This is a 350-bed hospital with an addition under construction which will give space for departments and add 150 beds. **Beverly Clanton Wilford**, '70, was married last August to Hubert H. Wilford. She is a registered Record Administrator at Piedmont Hospital in Atlanta.

Medical Technology

Barbara Rinn Wood, '69, is employed at Cabell-Huntington Hospital laboratory in Huntington, W. Va. She has been in the Department of Microbiology-Serology since August of 1970.

School of Graduate Studies

Gene Bruker, '62, who received his MS in microbiology at MCG, is professional service representative for Wallace Pharmaceuticals. He works in the Augusta-Savannah area. **Eleanor Morris Stringer**, '69, who received her masters in nursing at MCG, is employed as coordinator of the associate degree nursing program at the University of South Carolina in Aiken, S. C.

Continued from page 5

faced any problems in dentistry so far?

"Not at all — the school is very accommodating. In fact, I enjoy being one of a few. It's an advantage sometimes. The guys look out for you, and they are real considerate. It's a good working relationship."

Today: **Is marriage in your immediate future? Do you feel a woman with a doctoral degree should have a mate with a similar profession?**

"I will probably be married soon after I graduate from dental school. As for the second part of the question, this is foremost in my mind. I definitely plan to marry a professional person, and he will have to be understanding of my position and requirements for my time."

Today: **What do you think about women's lib?**

"I'm all for it. Women have a great deal to offer politically and professionally, and I feel that they should be given an equal opportunity to express this. I haven't actively participated, although I feel like I am contributing by being in dental school."

Becky Trowell

Becky Trowell is a fourth-year medical student whose mind is pretty well made up that she is going to practice pediatrics. She and several of her classmates are seriously considering a group practice in south Georgia.

Today: **Why are you here?**

". . . I had always felt that I would try to come, and when the time came nothing stood in my way, so I applied and was accepted. . . I was very happy that I got accepted, but also apprehensive."

Today: **Apprehensive?**

"Yes. The first few months of med school are very trying because. . . you've never studied that much before in your life. There are 100-plus people who all want to stay in, but they keep telling us that somebody is going to fall by the wayside, and you wonder — will it be me?"

Today: **Why have you chosen pediatrics as your specialty?**

"I like children — they're fun to work with since they don't have perhaps all of the prejudices that seem to take some of the fun out of life. When I did my first rotation on pediatrics, I knew it right there."

Today: **Even though you're single now, do you feel women MDs can find time to work families into their practices?**

"To me, women in medicine are no different from women in other professional areas, except that perhaps their hours are unfortunately a little longer. I think quality and not quantity is important in the time you spend with your children. Most parents, if they enjoy being with their children, and if they are good parents, will find the time and the right things to do with them. . . and this applies to women in medicine."

Today: **Do you have any desire to ever combine teaching with a private practice?**

"Yes. The group I plan to practice with intends to keep its academic ties to the world of medicine — perhaps serving as an elective to medical students or teaching several times a year at a medical college in our area."

Jo Alice Walker

Jo Alice Walker is in her third year at the Medical College and is working toward a PhD in pharmacology. She is a graduate of Fort Valley State College in Fort Valley, where she received a BS degree in zoology.

Today: **Why and when did you decide to seek a PhD in pharmacology?**

"It really wasn't until the latter part of my junior year that I became interested in pharmacology. It had always been toxicology — an area of pharmacology — that interested me most. However, I had a hard time finding a graduate program just in this particular area. But by some stroke of luck, my advisor at Fort Valley had met a faculty member from MCG who was recruiting students for pharmacology, and he interested me in this field. . . . So I ended up here, and I'm finding the study of the effects of drugs on the human body fascinating."

Today: **How do you intend to use your degree?**

"My goal is to go into research since this is what I really enjoy. Hopefully, I will be able to get a job with a pharmaceutical company in their research labs, but who knows at this time?"

Today: **Do you have any immediate plans for marriage?**

"I am dating someone seriously, and whenever the time is right we will get married. At this time, however, he is trying to get into medical school — hopefully here."

Katharyn Outzs

Katharyn Outzs is a second-year medical student and is married to her classmate, John Outzs. Katharyn is an accomplished musician who is now, with her husband's help, trying to build a harpsichord.

Today: **Why medical school?**

"Originally, I had planned a career in psychiatric social work. Then the summer after I graduated from Wellesley, I did a type of social work and decided it wasn't for me. I had thought about medicine vaguely before, but not enough to take the requisite courses in college. . . It was really incredible — here I was a history major and John, a philosophy major, trying to get into medical school, but we both made it."

Today: **Has it been a hard adjustment going from liberal arts to medicine?**

"It's a different way of thinking, and perhaps it's not as easy for me as for those who were in sciences all the way through, but I don't regret it because I would rather have all the other areas in my background."

Today: **Have you given thought yet to a specialty?**

"I haven't decided yet because I think going on the services for the last two years will make a difference."

Today: **Will being a woman influence your choice of a specialty?**

"Yes. That was one reason I had thought about psychiatry originally. However, after talking with some psychiatrists in my hometown, I'm not too sure about this any more. They seem so overworked and heavily scheduled. Maybe by the time I get out into the practicing world, group practices will make it easier to go into a more difficult specialty yet still be able to have a family."

Today: **Should all women doctors be married to other doctors?**

"No, I think they would have to be married to a special type of person — one who would want his wife to have a career in the first place. Secondly, I guess he would have to compromise and see that his wife's career is as important to her as his career is to him."

Today: **Have you faced any problems here so far in just being a woman?**

"No, and it has surprised me a little. To most of the boys I had dated from the South (other than John), the idea of their wives or any woman going into medicine was just anathema. So, I thought there might be a little more dislike here in gen-

Next page

eral. But, so far, none of the men I have had contact with have displayed any prejudice at all."

Lane Mathis

Lane Mathis is a second-year medical student who almost has one doctoral degree already. Before being accepted at medical school, she was working toward a doctor of education in chemistry at the University of Georgia. Everything is completed except her dissertation. For five years before this, Lane taught high school. Several people who were her students then are her classmates at MCG now.

Today: **After so much education already, why did Lane Mathis decide she wanted to go to medical school?**

"I had wanted to go to medical school all of the time, but thought it wasn't the place for a woman... then I changed my mind. I knew I didn't want to teach school for the rest of my life, so I went back to school and picked up the science courses I needed to get into med school. I was a math major at Emory."

Today: **Has the thought of a specialty crossed your mind yet?**

"Yes, I'm one of 18 students in the three-year curriculum, and last summer I did a rotation on pediatrics, and decided this would be my specialty. I'd never given any thought to this before. In fact, I wanted to go into internal medicine, but then pediatrics is just medicine on little people."

Today: **Do you really feel that pediatrics is a good area for women?**

"The bias that the general public feels towards women doctors is not as evident in pediatrics as in, say, surgery. Most any woman would feel perfectly confident in taking her child to a woman doctor. I feel, however, that the bias towards women in all areas of medicine is dissolving somewhat now."

Today: **Have you felt any prejudice here as a woman among so many men?**

"Not in the least. I've never been treated so royally or had so many doors opened for me, literally and figuratively, in my life. It has been truly delightful."

Today: **As a woman MD would you feel like you had to marry another doctor?**

"I don't feel that I would have to. However, I do think that it would make for a much easier relationship because I feel that only another doctor can understand the hours and dedication required of a physician."

Gail Lamb

Gail Lamb, wife of a bank branch manager and mother of three children, aged ten, seven and four, is a second-year medical student. Gail's life time dream came true when she was accepted for medical school. Her first year was rougher than the average student's though, because she commuted 240 miles each week between Augusta and Macon in order to go to school,yet spend some time with her family.

Today: **Why are you so determined?**

"In high school I knew this was what I wanted, but instead I went on to Emory and graduated...then decided to get married. A year later the first child came, and I thought, well, this is the end of my dream. After about six or seven years, I started thinking about it again, and decided 'if you're going to get out of life what you want, you've got to do it now and not judge by what others do or don't do'."

Today: **How does your husband feel about this?**

"He's glad. I think he realized that I was not an unhappy person, but that I was frustrated — just not completely satisfied with life. My husband has now transferred from Macon to an Augusta bank, and things are much easier. We didn't want to pull up roots until I was perfectly sure that I was going to make it here."

Today: **Have you given any thought to a specialty?**

"I've considered dermatology and anesthesiology because of the hours. But I've also given some thought to a contract type of practice at a hospital. However, it may be that a family practice residency will be required for this by the time I get out, so that could effect my decision. Right now I feel stronger about dermatology than any of the other areas, because I think that as a woman, I would be more conscious of the cosmetic problems involved."

Today: **As a woman here, do you ever feel discriminated against?**

"Not at all. If anything the discrimination has been in my favor. I mean others are more willing to make concessions because I have a family than I myself am willing to make. For instance, other people don't think it's so bad if I cut to stay home with my children, but I do. Sometimes it's just necessary though. I've felt more discrimination in talking with older doctors that I know from home, than I do from people in my class."

Lou Frank

Lou Frank, a third-year medical student, is the daughter of missionary parents who are now living in Mexico. Lou, however, grew up in Atlanta and attended Agnes Scott College, receiving a BA degree in biology with a minor in chemistry.

Today: **Why did you want to go to medical school?**

"I don't honestly know why. I've just always wanted to be a doctor; there is no big hero I had or anything like that."

Today: **Have you decided on a specialty yet?**

"I've more or less ruled out certain things rather than deciding on something definite. It's probably going to be pretty general though — internal medicine, family practice, possibly pediatrics."

Today: **Does being a woman influence this decision?**

"No. As a matter of fact, the general fields are really more time-consuming. If I were worried about it, I'd go into radiology, or ophthalmology, but I'm not. Maybe it's because I'm not married, or planning to be soon. . . . That might change my mind, but right now, it's not entering the picture."

Today: **Do you feel that the social life here is adequate?**

"Not really — what we need is something to integrate us with the whole campus. I know virtually no undergraduate students and very few of the graduate students. And it wasn't until this year when I started working with my classmates on the floor that I have gotten to know them as individuals."

Today: **Have you faced any particular problems here in being a woman, or do you feel that the school is pretty well equipped for women students?**

"Well, there are some places where it's obviously not; like on-call situations. At some of the local hospitals, there is an on-call room for women — even a whole suite of rooms at the new University Hospital.

"But where I'm at now, they're not well-equipped at all. There is just one room with two beds in it, and the guy sleeps in one, and I sleep in the other. There's no big problem though. We both wear green surgery suits, and nobody worries about anything. It's not really a bad situation. . . it's just obviously not set up for segregation." □

71 - 72 'Roadshow' Gathers Momentum

The 1971-72 series of Alumni dinners across Georgia is well under way, with five of eleven scheduled dinner meetings already completed.

The dinners, which feature reports from the campus by MCG spokesmen, have been uniformly well-received by alumni since inception of the "roadshow" program last year.

Programs held so far include:

Brunswick — Jesse Hunt, '55, was arrangements chairman for a program held Nov. 5 at the King & Prince on St. Simons Island. MCG representatives present included Pres. Harry B. O'Rear, Robert G. Crounse, James C. Austin and Mary Hallinan. Guests numbered 25.

Tifton — Robley Smith, '53, handled local arrangements for 28 guests who met Nov. 9 at the Spring Hill Country Club. Curtis Carter, '38, W. H. Pool, '52, and Mr. Austin were the MCG spokesmen.

Gainesville — The Chattahoochee Country Club was the site Nov. 16 for a meeting that attracted 38. Harvey Newman, '48, was local arrangements chairman; Donald Schmidt, '49, spoke for the Medical Alumni Association, and Dr. O'Rear, Robert Reynolds and Mr. Austin brought greetings from MCG.

Rome — Henry Lucas, '55, was arrangements chairman for a Nov. 17 program that attracted 45 for dinner at the Holiday Inn. Drs. Carter and Schmidt and Joseph Bailey, '55, told the MCG Story.

Albany — Fifty-three guests came to a dinner arranged by Bob Waller, '48, at the Doublegate Country Club Nov. 18. Drs. O'Rear, Robert Liebelt and Mr. Austin were spokesmen for the institution.

Other dinner meetings scheduled as *MCG Today* goes to press include:

Savannah — Irving Victor, '45, is expecting a large crowd for a program Dec. 1 at the Boar's Head Inn.

Macon — John Paul Jones, '41, will be arrangements chairman for a Macon area dinner at the Idle Hour Country Club, Dec. 9.

Atlanta — Herbert Alden, '24, is arranging a Christmas banquet at the Marriott Motor Hotel, Dec. 17.

Valdosta — Richard (Pop) Nutt, '55, has reserved the new Elks Club for a Valdosta area meeting January 11.

Columbus — Floyd Jarrell, '46, will make arrangements for a gathering at the Columbus Country Club January 13.

Athens — Don Branyon, '59, is planning for guests to meet at the Athens Country Club, February 20.

Augusta — Dan Sullivan, '49, is local arrangements chairman for a meeting to be held at the Augusta Country Club February 10.

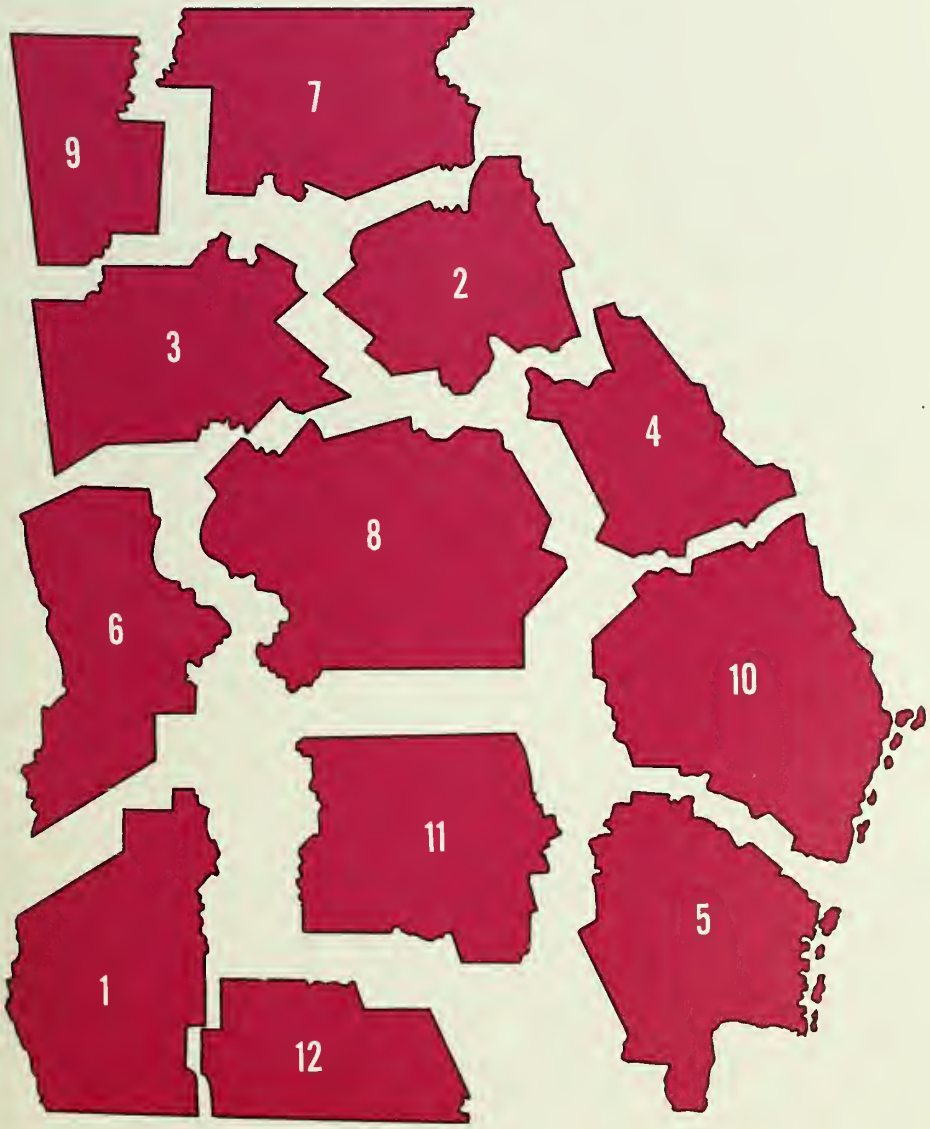
Alumni Fellowship

Good food and stimulating programs started off the current series of MCG School of Medicine Alumni dinners across the state. The first dinner of the series, held at Brunswick November 5, featured President Harry B. O'Rear (top, center) and Robert G. Crounse. Guests there numbered 25. The next meeting, held November 9 at Tifton, included presentations by W. H. Pool, '52. (below, at extreme right of photo) and Curtis Carter, '38. That meeting attracted 28 guests. The next issue of *MCG Today* will feature a photo essay compiled from photos at each of the 12 dinners planned.

Twelve geographical regions have been delineated in Georgia to simplify arrangements for local Medical College of Georgia alumni functions. The regions are shown on the accompanying map; the following legend shows the counties contained in each region.

Region 1 Calhoun, Decatur, Dougherty, Early, Grady, Lee, Miller, Mitchell, Seminole; parts of Clay, Randolph, Sumpter and Terrell.

Region 2 Barrow, Clarke, Elbert, Greene, Hart, Madison, Morgan, Oconee, Oglethorpe, Walton, Wilkes; part of Jackson.



Region 3 Carroll, Cobb, Cowetta, DeKalb, Douglas, Fayette, Fulton, Haralson, Heard, Newton, Paulding, Rockdale; parts of Gwinnett, Henry and Jasper.

Region 4 Burke, Columbia, Glascock, Jefferson, Lincoln, McDuffie, Richmond, Taliaferro and Warren counties in Georgia; Edgefield, McCormick and parts of Abbeville, Aiken, Barnwell, Lexington and Saluda in South Carolina.

Region 5 Appling, Bacon, Brantley, Camden, Charlton, Glynn, Pierce, Ware, Wayne; parts of Baker and Nassau counties in Florida.

Region 6 Chattahoochee, Harris, Marion, Meriwether, Muscogee, Quitman, Schley, Stewart, Talbot, Taylor, Troupe, Webster; parts of Clay, Macon, Randolph, Sumpter and Terrell counties in Georgia; parts of Barbour, Chambers, Henry, Lee and Russell in Alabama.

Region 7 Banks, Cherokee, Dawson, Fannin, Forsyth, Franklin, Gilmer, Habersham, Hall, Lumpkin, Murray, Pickens, Rabun, Stephens, Towns, Union, White; parts of Gwinnett and Jackson.

Region 8 Baldwin, Bibb, Bleckley, Butts, Crawford, Hancock, Houston, Jones, Lamar, Monroe, Peach, Pike, Putnam, Spalding, Upson, Washington, Wilkinson; parts of Dodge, Henry, Jasper, Johnson, Laurens, Macon and Pulaski.

Region 9 Bartow, Catoosa, Chattooga, Dade, Floyd, Gordon, Polk, Walker and Whitfield.

Region 10 Bulloch, Bryan, Candler, Chatham, Effingham, Emanuel, Evans, Jenkins, Liberty, Long, McIntosh, Screven, Tattnal, Toombs, Treutlen; parts of Johnson, Montgomery and Wheeler.

Region 11 Atkinson, Ben Hill, Coffee, Crisp, Dooley, Erwin, Jeff Davis, Telfair, Tift, Turner, Wilcox, Worth; parts of Berrien, Dodge, Laurens, Montgomery, Pulaski and Wheeler.

Region 12 Brooks, Clinch, Colquitt, Cook, Echols, Lanier, Lowndes, Thomas; parts of Berrien and Mitchell.
